

Name: Damian Zukowski

Pair: Me, myself and I

Amount of completed tasks: 7

Which tasks were left undone or incomplete: exercise 2, 9 and 10

Self-assessment:

This exercise was ok etc. for me because... difficulty is okay, I spent more time on some tasks than I anticipated but most of them were just right. They required some thinking and checking up for methods, which is good!

Doing this exercise, I learned... more about classes, which are awesome! I just need to use them more often to really memorize their methods etc.

I am still wondering...

I understood/did not understand that... ; I did/did not know that... ; I did/did not manage to do...

Task 2 was quite complex, and I did not complete it, though I have some parts done correctly, I hope.

Task 9 and 10 I simply ran out of time and energy to complete.
